@expert-software-engineer

lets say,
you went to a restaurant

the waiter comes to you
and asks for your order

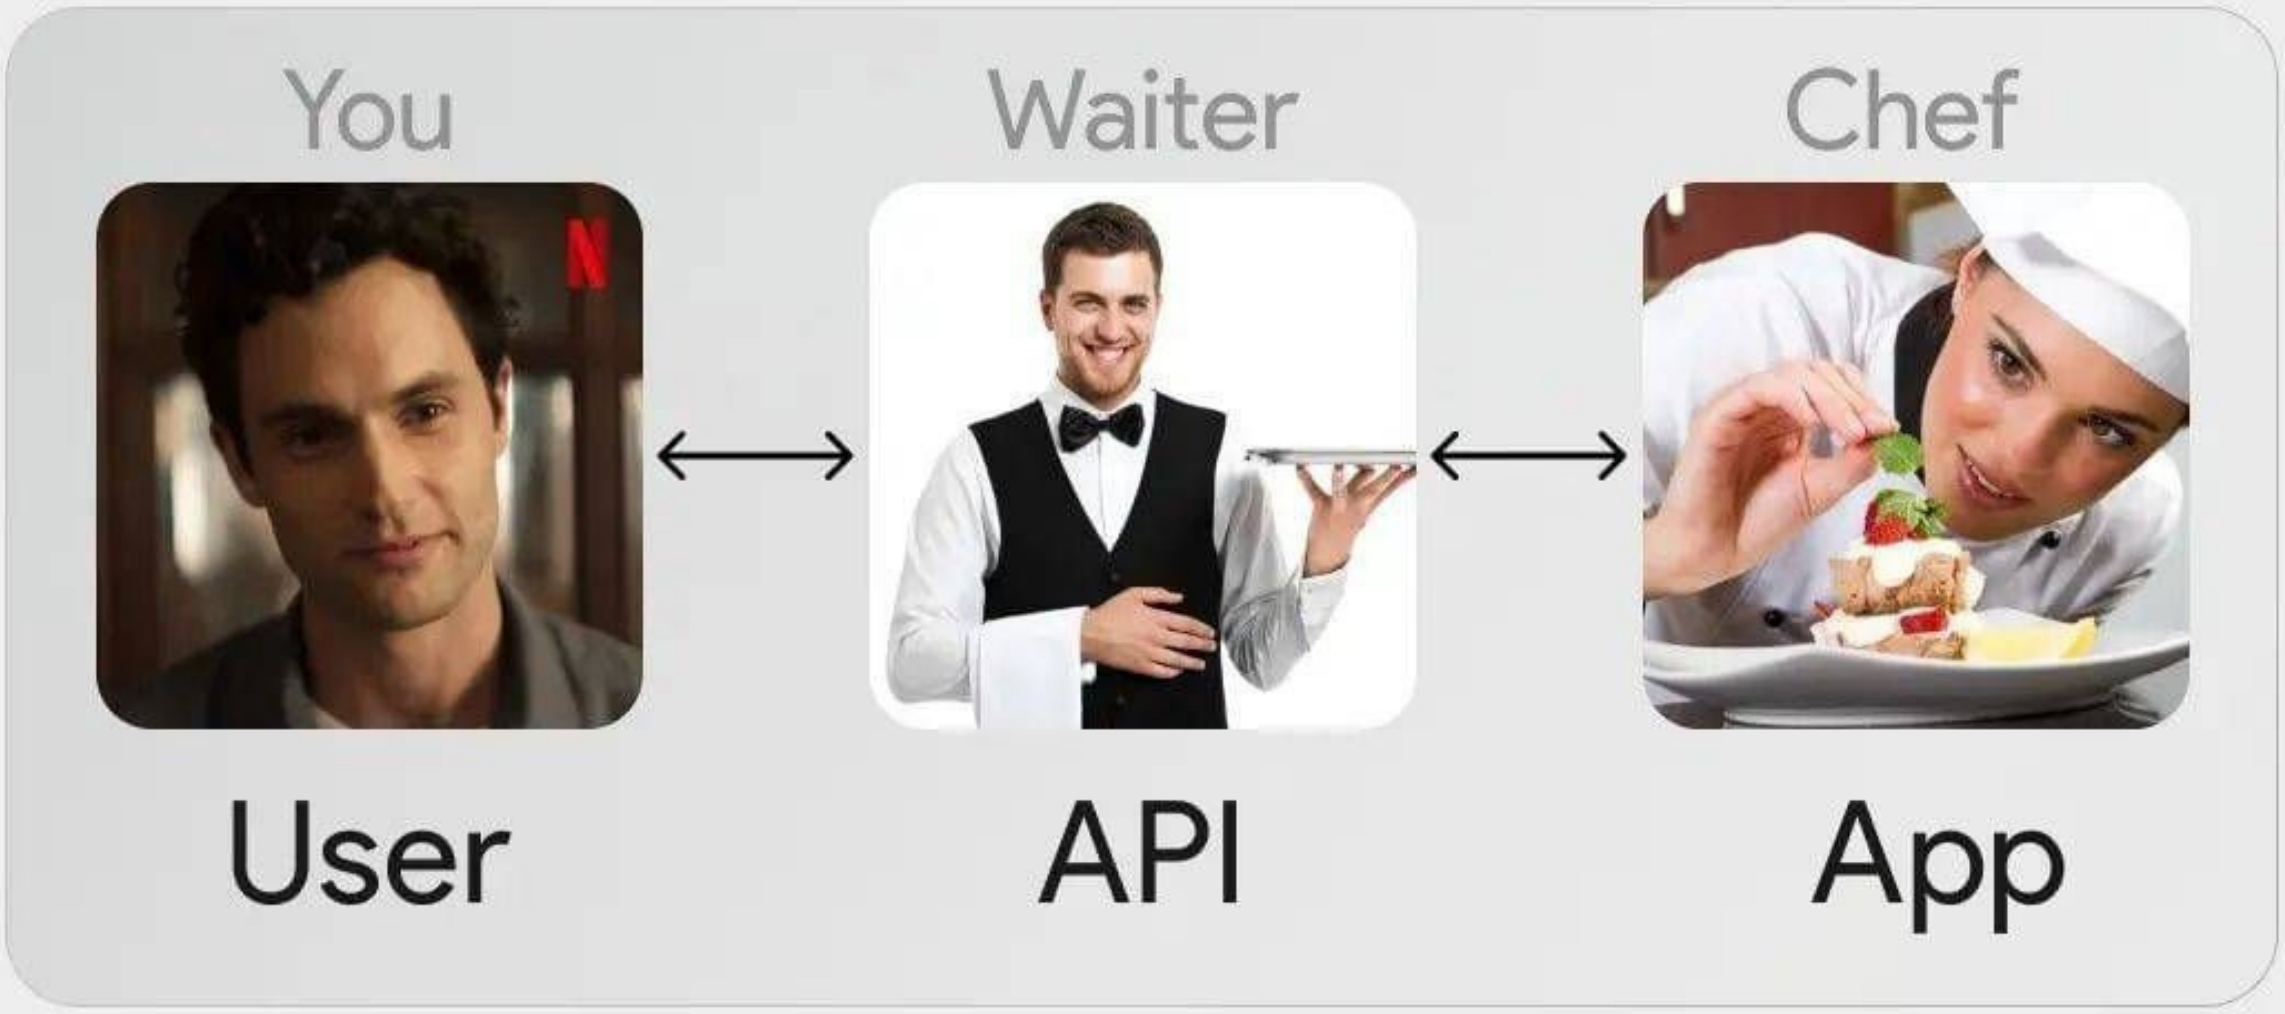
the waiter then sends
the order to the Chef

The Chef start preparing the food

after the food is prepared

The Chef gives the food to the waiter and it comes to you

The waiter acts as a connection between you and the Chef



The waiter is API

An API is a way for two or more computer programs to communicate with each other
